

THE PERFECT CHOC CHIP BISCUIT RECIPE

In an experimental lesson on Friday morning, our Senior Food Technology class tested recipes to find out just how many chocolate chips are needed to create the perfect biscuit. Students considered both their own personal taste and the potential costs involved for business selling the biscuits.

In the end, they found that $\frac{3}{4}$ cup of choc chips to $1\frac{1}{2}$ cups of flour was the optimum amount!

3 August	P&C meeting (via zoom)
3-7 September	Trial HSC examinations

Principal's report

with Dr Joanne Bellette

A colourful end to Semester 1

Corowa High School's end of Term 2 Colour Run was an opportunity to recognise the challenges we had confronted in home learning, health and wellbeing since the start of the year and the theme 'In this Together' reflected our determination to remember how we are collectively accountable for our community and its welfare. I'm incredibly proud of how our students have rallied under these burdens and their ongoing determination to ensure that they, their loved ones and the broader community stay safe and healthy in the face of COVID-19. The colour run was a fantastic outlet and it was wonderful to see our students running, laughing and singing their way around the school. A big thanks must go to Mrs Filliponi and our office staff for all their hard work in ensuring the day was such a success.

The importance of attendance and the completion of set work

This week I spoke to senior students about the importance of attending school regularly and completing all set work so as to avoid being issued with N Award warnings or, more serious still, an N Determination. If your child

receives a letter of warning or an N Determination from the school please make contact with the faculty concerned to understand what needs to be redressed and support your child in completing the necessary work if possible. Remember we are here to help if additional support is needed, just call the office on (02) 6033 1889.

Scholarships for future teachers

I also spent some time talking to our senior students as a cohort, and a number of individual students since, about career opportunities post high school. In particular I was wanting to highlight for these students the need for people with high school teaching qualifications. There are a number of scholarships made available to students exiting high school who want to complete a university degree in education. These present students with fantastic financial support whilst they are university students and also an assured job at the end of their degree. Given our current economic climate and job market, this seems a pathway worthy of consideration and further conversation. If you have a child or someone else in your family who may be interested in pursuing a career in teaching, please contact the school and I'd be happy to talk.

Sweet substitute for crockery

Year 8 TEC students have put their creativity to the test recently by using our 3D printers to create alternative ways to display food. Students were challenged to design an apparatus that could display lollies, while steering clear of anything that resembled a plate or bowl. They devised some fantastic models!

Discovering the science behind flight

Students in Tongarla class have been experimenting with different types of paper planes to find out which designs can fly the furthest and stay in flight for the longest time.

They have tested their planes in different locations, in different types of weather conditions and discussed what elements may affect how well each plane flies.

Revamped school oval is open for business!

After an extended closure, our school oval is finally open to students again!

The oval closure allowed for the installation of our new watering system and time for the area to re-seeded. The oval should be green year-round from now on for the use and enjoyment of our students and the wider community.

Stage 5 re-vegetate school grounds

Our Stage 5 Agriculture class got to work on Tuesday planting trees donated to our school by Corowa District Landcare. This planting session is part of a re-vegetation project near our Agriculture plot.

End of semester colour run

We celebrated the end of a difficult semester with some fun at our colour run on the last day of Term 2.

Year 8 explore matters of the heart

Year 8 Science students in Mrs Lowe's class participated in a lamb's heart dissection on Monday to further their understanding of internal organs and their functions.

Ice cream for breakfast? Yes, please!

Mrs Delaney's Year 7 students enjoyed ice cream for breakfast on Wednesday after making it in class. Through this delicious experiment, they observed the icecream change in state from liquid to solid.

Thanks, Mrs Rutland!

Last week we said farewell to our canteen manager, Lisa Rutland. Both students and staff are sad to see her go, but we wish Lisa all the best!

Stay tuned for the announcement of our new canteen manager in our next newsletter.

Seniors discover microbes in water

Senior Biology students tested water for presence of microbes and experimented with the best ways to kill said microbes in class this week. The water was sourced from our school ponds and a bore water source.

Damper, anyone?

Stage 5 Food Technology students made the classic Australian bread, damper, in the final week of Term 2. They utilised culinary skills developed this year including kneading and hand mixing.

**WE NEED
YOU FOR
OUR P&C**

**The next meeting is on
Monday 3 August at 6.30pm**
